PROFESSIONAL SUMMARY

React Native and full-stack engineer with 3 years of production experience building and shipping cross-platform mobile and web applications. Currently architecting a 3-app TypeScript + React Native ecosystem (Consumer, Merchant, Delivery Partner) for a food delivery and logistics platform, handling real-time order tracking, push notifications, live socket sync, and CI/CD pipelines. Comfortable owning features end-to-end — from API contract through to App Store/Play Store delivery — and thrives in async, high-ownership environments.

TECHNICAL SKILLS

Mobile: React Native (Expo & bare workflow), iOS & Android, FCM Push Notifications, Background Location, EAS Build & Submit

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Chakra UI, Material UI v6, Redux Toolkit, React Query, Zustand, Context API

Backend: Node.js, Express.js, REST APIs, Socket.io (WebSockets), GraphQL (Apollo), Prisma ORM

Databases: PostgreSQL, Supabase, MongoDB, Redis, Firebase, Appwrite

AI / LLMs: Gemini API (production), OpenAI API, Anthropic API — prompt engineering, conversational AI features

Payments: Paystack (production), Stripe API

Cloud/DevOps: GCP, GitHub Actions (CI/CD), Expo EAS, Vercel, Netlify, Render, Sentry

Practices: Agile/Scrum, Clean Architecture, Code Reviews, TDD, Mobile-first Design, Async Remote Workflows

PROFESSIONAL EXPERIENCE

React Native Developer

Nov 2025 – Present

Mestra (Food Delivery & Logistics Platform) | Remote (Contract)

- Architected 3 production TypeScript + React Native apps (Consumer, Merchant, Delivery Partner) for iOS and Android — 95% crash-free rate across all three. Consumer app live on Google Play and the App Store.
- Built Firebase Cloud Messaging push notification infrastructure handling foreground, background, and quit-state events — 98% delivery rate.
- Implemented real-time location tracking with native permission management for active deliveries.
- Designed Zustand + React Query state architecture with optimistic updates and Socket.io real-time sync — reduced redundant API calls.
- Optimised app performance via FlatList virtualisation, lazy loading, and image caching — reduced launch time by 35%, sustained 60fps on low-end Android.
- Participated in weekly Agile sprints; conducted cross-repo PR reviews, wrote Jest tests, and maintained technical documentation.

Freelance Full-Stack Developer

May 2025 – Present

Self-Employed | Remote

- Integrated Gemini AI API to build a production gym chatbot — context-aware responses, session management, and dynamic prompt engineering inside a React Native app.
- Built scalable SSR apps with Next.js and TypeScript; set up CI/CD pipelines via GitHub Actions and Expo EAS.
- Delivered full-stack web and mobile applications for clients across e-commerce, content management, and social platforms — end-to-end ownership from requirements to deployment.

Frontend Developer

Dec 2024 – May 2025

Vorbtech Innovative Solutions | Remote, Nigeria (Contract)

- Delivered bundle optimisation, lazy loading, and code splitting — reduced page load times by 15%, Lighthouse scores 65 to 90+.
- Established code quality standards with Jest + React Testing Library, ESLint/Prettier — reduced post-release bugs by 50%.
- Introduced Agile workflows and mobile-first responsive design — reduced mobile bounce rates by 30%, boosted user engagement by 15%.

Mobile Development Intern

Jun 2024 – Dec 2024

Uleval Technology | Hybrid, Lagos, Nigeria

- Engineered video streaming solution reducing latency from 10+ seconds to under 2 seconds via React Native caching and compression — improved user retention by 35%.

- Integrated Appwrite for auth, real-time database sync, and cloud storage — supported 1,000+ sign-ups in first month.
- Built real-time search and recommendation engine — improved content discovery by 50%, boosted video views by 40%.

Frontend Engineer

Aug 2023 – May 2024

Okike Consults | Remote, Nigeria (Contract)

- Built responsive React applications from Figma designs using Tailwind CSS, RESTful API integrations, and Redux/Context API state management.
- Participated in Git workflows, peer code reviews, and implemented client-side validation, lazy loading, and image optimisation.

NOTABLE PROJECTS

TasteHub — Food Ordering & Delivery Platform — MERN + Redis + WebSockets + GraphQL

- Full-stack platform processing 50+ daily orders with real-time WebSocket status updates; Redis caching cut query times by 60%; 99% uptime at 30+ concurrent users.

EventWave — Event Ticketing & Management — MERN + Paystack

- Scalable platform supporting 100+ concurrent sessions with zero double-bookings via optimistic locking and distributed seat reservation.

Alora — Video Sharing Mobile App — React Native + Appwrite + FCM

- Collaborative filtering recommendation engine, chunked uploads, adaptive bitrate streaming — increased session duration by 20%, DAU by 30%.

Chatty — Real-Time Chat App — React Native + Socket.io + Redux

- Resilient messaging with automatic reconnection, offline message queuing, Redux state persistence, and 85%+ Jest test coverage.

EDUCATION

B.Eng. Computer Engineering — Caritas University, Enugu, Nigeria

Graduated 2025

AVAILABILITY & REMOTE WORK

Based in Lagos, Nigeria (WAT, UTC+1). Available for US and European business hours overlap. Experienced with fully async workflows: GitHub PRs, Linear, Slack, Zoom, and Notion. Consistent track record of self-managed delivery with no micromanagement required.
